## INTERNSHIP OBJECTIVE

Third-year Computer Science student at Ain Shams University seeking a software engineering or UI/UX internship. Proficient in 8+ programming languages including C++, Python, Java, JavaScript, TypeScript, Dart, C#, Scala, and Shell Scripting, with hands-on experience in full-stack development, cross-platform mobile apps, and user-centered design. Comfortable on Linux and with Git-based workflows. Eager to contribute to real-world products, learn from a professional team, and apply academic and project experience in an industry setting.

## EDUCATION

### B.Sc. Computer and Information Sciences

Oct 2023 – Present

Ain Shams University, Cairo, Egypt · 3rd Year (Currently)

## EXPERIENCE

### Head of UI/UX & Design | ConnectX

Oct 2024 – Present

- ▶ Lead the design team at ConnectX, overseeing UI/UX processes from wireframing to high-fidelity prototypes in Figma.
- ▶ Defined component libraries and design systems to ensure visual consistency across the product.
- ▶ Collaborated with developers to translate designs into production-ready Flutter interfaces.

### Game Developer & UI/UX Instructor | OSC – Open-Source Community

Oct 2024 – Present

- ▶ Developed 2D games using Godot engine and from scratch with C++ and Python (SFML).
- ▶ Delivered UI/UX workshops teaching open-source design tools to fellow students as a voluntary activity.

### UI/UX Designer & Flutter Developer | Zawraq Development Team

Oct 2023 – Present

- ▶ Designed user interfaces and wireframes for client-facing development projects.
- ▶ Worked within an agile team delivering web and mobile design assets using Figma and Adobe XD.
- ▶ Make pages using dart and flutter

## PROJECTS

### FOS – FCIS Operating System — C · Systems Programming

- ▶ Contributed to an educational OS kernel project: fixed critical CLI rendering bugs (destructive backspace / ghost characters), implemented insert mode for the interactive shell, and overhauled screen redraw logic.
- ▶ Implement Dynamic allocation from Scratch and manage fault handling with two different Methods.
- ▶ Integrate the OS to run with Qemu (Full-system emulation) as a launcher for the OS kernel for more stable debugging.

### dot-man — Dotfile Manager — Python · Shell Script · Git · CI/CD

- ▶ Built a CLI tool in Python for managing Linux dotfiles across multiple machines using git-powered branching — each branch represents a distinct configuration (work, personal, server), switchable with a single command.
- ▶ Implemented automatic secret detection and redaction (API keys, tokens, passwords), remote sync via GitHub, pre/post deploy hooks, dry-run mode, and shell completions for Bash, Zsh, and Fish.

### Text Completer (Autocomplete Engine) — C++ · Qt · CSS

- ▶ Built a real-time autocomplete widget using custom trie/data-structure backend and a polished Qt UI.
- ▶ Compact-on-blur / expanded-on-focus UX behavior with custom CSS theming.

### Examination System — Java · OOP

- ▶ Full-featured exam platform supporting exam creation, timed delivery to students, grade tracking, and result statistics.
- ▶ Implemented exam encryption and role-based access for instructors and students.

### cppml — Machine Learning Library from Scratch — C++ · OOP · Scientific Computing

- ▶ Developed a C++ machine learning library implementing **Linear and Polynomial Regression** from first principles.
- ▶ Engineered modules for **dataset handling, feature scaling, matrix computation, model persistence, and prediction workflows**.
- ▶ Strengthened expertise in **machine learning fundamentals and software design** through low-level implementation.

**Heart Disease Prediction Web App** — Python · Streamlit · ML

- ▶ Trained and deployed machine learning classification models to predict heart disease risk from patient data.
- ▶ Built interactive Streamlit dashboard with input controls and probability output visualization.

**Money Insights** — Flutter · Dart

- ▶ Personal finance tracker for recording transactions, calculating monthly expenses and savings with visual reports.

**WAN Video 2.1 — Open Source Contribution** — Pull Request · Documentation / Setup

- ▶ Submitted a pull request to the WAN Video 2.1 project improving the Windows WSL setup guide and development environment documentation.
- ▶ Demonstrated open-source collaboration skills: forking, branching, writing clear commit messages, and submitting a reviewed PR.

**ConnectX Website** — UI/UX Design · Web · Figma

- ▶ Designed and delivered the official website for ConnectX as Head of UI/UX, covering information architecture, responsive layouts, and brand-consistent visual design.
- ▶ Produced high-fidelity Figma prototypes and collaborated with developers to ship the final product.

**Inkognito game at FCAI game jam**— Godot – Game design

- ▶ Designe stages and game flow.
- ▶ Design character and game asstets.
- ▶ Develop character mechanics.

TECHNICAL SKILLS

|               |                                                                                             |
|---------------|---------------------------------------------------------------------------------------------|
| Languages     | C++ · Java · Python · JavaScript · TypeScript · Dart · C# · Scala · Shell Script · HTML/CSS |
| Frameworks    | Flutter · Qt · SFML · Streamlit                                                             |
| Design Tools  | Figma · Adobe XD · Lunacy · Penpot · Miro · Framer · Adobe Photoshop · Illustrator          |
| Dev & Systems | Git · GitHub · Linux (proficient) · Bash Scripting · VS Code · Godot Engine                 |
| Concepts      | OOP · Data Structures & Algorithms · Machine Learning (basics) · Agile / Teamwork           |
